SUMMARY

Computer Science undergraduate specializing in Generative AI and Machine Learning, with hands-on experience building LLM-powered applications using Python, Hugging Face Transformers, LangChain, and LangGraph. Skilled in prompt engineering, RAG pipelines, NLP, and AI agent workflows, with a full-stack development background (Django, Flask, REST APIs) for deploying AI models into production-ready applications. Seeking an AI Engineer role to apply technical skills in building and deploying generative AI solutions.

SKILLS

Languages: Python, SQL

Frameworks: Django, Flask, LangChain, LangGraph, Hugging Face Transformers

AI / GenAI: LLMs (OpenAI, Gemini), Hugging Face Transformers, Prompt Engineering, AI Agents, RAG, NLP, Machine Learning, Deep Learning

Web Development: HTML5, CSS, JavaScript, REST APIs

Tools & Platforms: Git, GitHub, VS Code, Docker, Power BI, Excel, SQLAlchemy, SQLite

Concepts: Object-Oriented Programming, Data Visualization, Data Cleaning, Statistical Analysis, Exploratory Data Analysis

Soft Skills: Problem-Solving, Communication, Team Collaboration

EXPERIENCE

Frontend Developer Intern — Mopuri Business Solutions 2026

- Built responsive web pages using HTML, CSS, and JavaScript, improving cross-device usability.
- Collaborated with a development team to improve website design and overall user experience.
- Identified and fixed bugs, tested web pages for functionality, and used Git/GitHub for version control and project management.

Python Intern (Virtual) — Aavanto & Lorven Technology Pvt. Ltd. 2023

- Developed Python programs covering number operations, pattern generation, and calculator applications.
- Built small utilities using loops, conditional logic, and functions to strengthen core programming skills.
- Practiced debugging techniques that improved code accuracy and reliability.

PROJECTS

Emergency Health Alert System Using Machine Learning and Deep Learning — Personal Project

- Built and optimized a supervised machine learning classification model using structured healthcare datasets for patient risk prediction.
- Conducted exploratory data analysis (EDA) and applied feature selection techniques to improve model accuracy.
- Evaluated model performance using classification metrics, improving prediction reliability for clinical decision support.
- Integrated a real-time alert mechanism to support emergency response and decision-making.

TaskMate AI Chatbot — HTML5, CSS, JavaScript, LLMs, Flask

- Built Task_Man, a full-stack AI-powered task management web application using Flask, SQLAlchemy, and SQLite with secure user authentication.
- Implemented a hybrid AI chat assistant combining rule-based command parsing with OpenAI API integration for conversational task management.
- Designed RESTful APIs and an analytics dashboard to track task completion trends, including chat export and filtering features.

Cravio Food Delivery App — HTML5, CSS, JavaScript, Django

- Developed a responsive food delivery web application with secure user authentication and role-based access control.
- Implemented restaurant listings, menu browsing, cart, checkout, and order management using Django and SQLite.
- Built a dynamic, database-driven application with an intuitive user interface and efficient backend functionality.

EDUCATION

Bachelor of Technology, Computer Science 2022 – 2026

Siddharth Institute of Engineering and Technology — CGPA: 7.98

Intermediate (Class XII) 2016 – 2018

Sri Chaitanya Junior College — Percentage: 69.8%

Secondary Education (Class X) 2015 – 2016

Vijayavani English Medium School — GPA: 8.7

CERTIFICATIONS

- Trainee, Full Stack Developer in Python — KODNEST
- Full Stack Generative and Agentic AI with Python — Udemy
- Developing Generative AI Apps in Azure — Microsoft
