SUMMARY

Computer Science graduate capable of building end-to-end software applications by combining **Python**, **Generative AI**, backend development, databases, APIs, and modern frontend technologies. Experienced in transforming application ideas into functional products, including AI-powered chatbots, database-driven web applications, REST APIs, authentication systems, and intelligent workflows.

Skilled in developing backend systems with **Python**, **Django**, and **Flask**, building AI solutions using **LLMs**, **Hugging Face**, **LangChain**, **LangGraph**, **RAG**, and prompt engineering, and creating responsive web interfaces using **JavaScript** and **React**. Comfortable working with **SQL** databases, **Git/GitHub**, **Docker**, and **Vercel** for development, version control, and deployment.

Able to take a problem from understanding requirements → designing the solution → developing the application → integrating AI and APIs → connecting databases → testing and debugging → deploying the final product.

SKILLS

Languages: *Python, JavaScript*

Frontend: *HTML5, CSS3, React.js*

Backend: *Django, Flask, REST APIs*

AI / GenAI: *LLMs, OpenAI, Gemini, Hugging Face Transformers, LangChain, LangGraph, Prompt Engineering, RAG, AI Agents*

Databases: *SQL, SQLite, Qdrant, Pinecone*

Deployment / Tools: *Vercel, Git, GitHub, Docker, VS Code*

Concepts: Object-Oriented Programming, Data Visualization, Data Cleaning, Statistical Analysis, Exploratory Data Analysis

EXPERIENCE

Software Developer Intern — Mopuri Business Solutions | 2026

- **Developed and maintained** backend functionality using **Python** and **Django**, implementing server-side logic and application workflows.
- **Integrated** databases and APIs to store, retrieve, and process application data efficiently.
- **Debugged** backend issues, **tested** application functionality, and used **Git/GitHub** for version control and collaborative development.

Python Intern (Virtual) — Aavanto & Lorven Technology Pvt. Ltd. | 2023

- **Developed Python** programs covering number operations, pattern generation, and calculator applications.
- **Built** small utilities using loops, conditional logic, and functions to strengthen core programming skills.
- **Practiced** debugging techniques that improved code accuracy and reliability.

PROJECTS

TaskMate AI Chatbot — HTML5, CSS, JavaScript, LLMs, Hugging Face Transformers, Flask

- **Built** Task_Man, a full-stack AI-powered task management web application using **Flask**, **SQLAlchemy**, and **SQLite** with secure user authentication.
- **Implemented** a hybrid AI chat assistant combining rule-based command parsing with **OpenAI API** integration for conversational task management.
- **Designed RESTful APIs** and an analytics dashboard to track task completion trends, including chat export and filtering features.

Cravio Food Delivery App — HTML5, CSS, JavaScript, Django

- **Developed** a responsive food delivery web application with secure user authentication and role-based access control.
- **Implemented** restaurant listings, menu browsing, cart, checkout, and order management using **Django** and **SQLite**.
- **Built** a dynamic, database-driven application with an intuitive user interface and efficient backend functionality.

Emergency Health Alert System Using Machine Learning and Deep Learning — Personal Project

- **Built and optimized** a supervised **machine learning** classification model using structured healthcare datasets for patient risk prediction.
- **Conducted** exploratory data analysis (EDA) and applied feature selection techniques to improve model accuracy.
- **Evaluated** model performance using classification metrics, improving prediction reliability for clinical decision support.
- **Integrated** a real-time alert mechanism to support emergency response and decision-making.

EDUCATION

Bachelor of Technology, Computer Science — 2022 - 2026

Siddharth Institute of Engineering and Technology — CGPA: 7.98

Intermediate (Class XII) — 2016 - 2018

Sri Chaitanya Junior College — Percentage: 69.8%

Secondary Education (Class X) — 2015 - 2016

Vijayavani English Medium School — GPA: 8.7

CERTIFICATIONS

- Trainee, Full Stack Developer in Python — **KODNEST**
- Full Stack Generative and Agentic AI with Python — **Udemy**
- Developing Generative AI Apps in Azure — **Microsoft**
